WIND MILLS
OIL-BATH

The WOODMANSE Policy

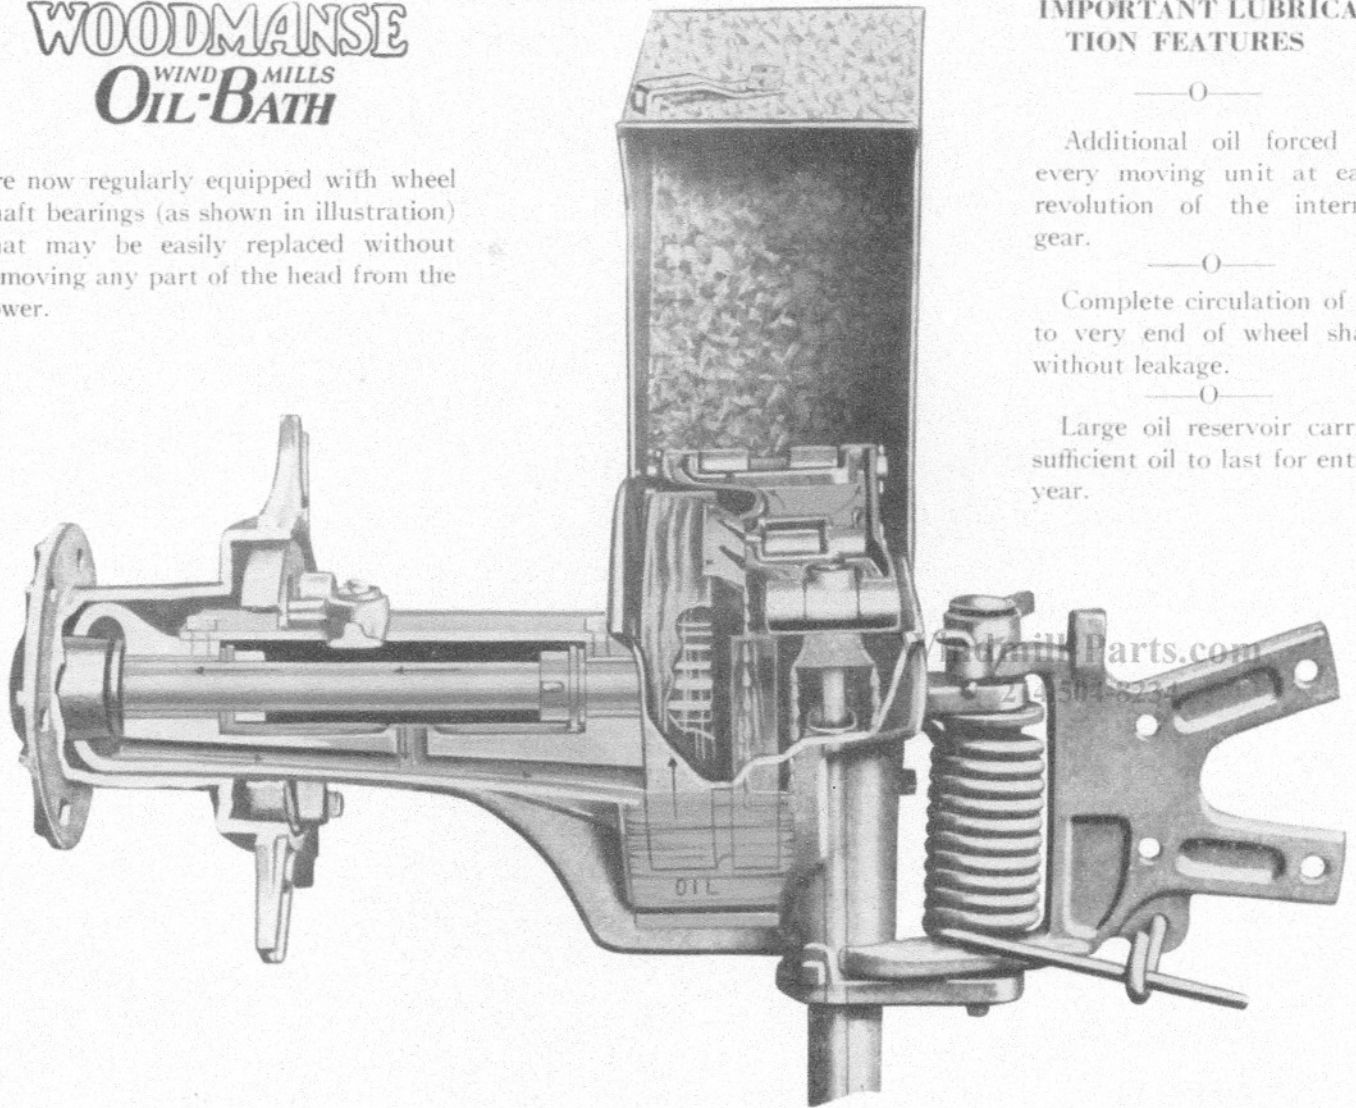

From a careful study of the above illustration of the working parts of the WOODMANSE OIL-BATH WINDMILL it will at once be evident to anyone expert in windmill construction that the WOODMANSE MANUFACTURING COMPANY has taken every precaution to re-inforce their mill against every possible weakness. This thoroughness is in accordance with a policy followed consistently for sixty years—namely, to build a windmill as good as, or superior, to any mill manufactured and to sell that windmill at the lowest price as possible consistent with its quality. We feel that the present WOODMANSE OIL-BATH WINDMILL is a superlative triumph of that policy.

THE PERFECTLY OILED WINDMILL
