1899 MODEL PUMPING AERMOTOR

The parts illustrated above are for the Pumping Aermotor as made in 1899 and later. This mill pulls into the wind, and is easily distinguished from all other models by the short regulating spring on the inner end of the tailbone. The parts which are peculiar to this model are numbered from 401 up. Many parts from the 1898 Model are also used in the 1899 Model and will be found among the numbers from 201 up.

Parts used on the first mills of this Model, but not shown here, are 406, 407, and 408, replaced by 456, 457 and 458, and 411 re-
