

# CURRIE TURN ON- --- SHUT OFF AUTOMATIC REGULATOR

For Any Kind of Tower or Mill

CAN BE ATTACHED TO ANY windmill tower (wood or steel) for automatically turning-on and shutting-off any make of windmill so that your water tank will always be full, but never run over. Every windmill pumping water in stock tank should have a CURRIE Regulator. The tank may be close or at a distance from the tower. Complete instructions furnished with each unit.

KEEPS WATER SUPPLIED  
"I have used Currie Windmills for the last 20 years and think they are fine mills—I own five of them now. The Automatic Regulator certainly is a great help to me, it saves a lot of time and always keeps the cattle supplied with water."

R. B. YAUK, Selman, Okla.
