

1873. Twenty Years' Experience in the Wind Mill Business. 1893.

"EUREKA"

SELF-REGULATING

WIND MILLS.

The "Eureka" Steel is the Strongest and Fastest Pumping Mill in the Market.

It has more Points of Excellence than any other Steel Mill. The gears being covered to protect them from Sleet or Ice, also from Dust or Sand in some parts of the country.

Self-oiling Brass Oil Cups for each bearing, to carry three months supply of oil.

The only absolutely Positive Wind Mill Brake. Governs itself perfectly.

EVERY MILL GUARANTEED. Can be used on our Patent Tubular Steel Tower or Wooden Tower. Length of stroke 4, 5½ and 7 inches.

SMITH & POMEROY,

The Eureka Wind-Mill Again Successful!

ADOPTED BY U. S. GOVERNMENT.

LIEUT.-COL. M. I. LUDINGTON,

Deputy Quarter-master General, U. S. A.,

Phila. Depot of the Quarter-master's Dept.
1428 Arch St., Philadelphia, Pa., Sept. 4, 1888.

SMITH & POMEROY:

Gentlemen:—I take pleasure in communicating to you the report of Superintendent Frederick Kaufmann, of the Philadelphia National Cemetery regarding the EUREKA Wind Mill, recently erected by you at said Cemetery as follows:

"The EUREKA Wind Mill recently erected at this Cemetery, by Mr. H. M. Sciple, gives full satisfaction in every respect. Every part of it works smoothly and easily. It furnishes a good supply of water and I consider it one of the best Mills in this neighborhood."

Very respectfully,

M. I. LUDINGTON,

Deputy Q. M. General, U. S. A.

E. P. FRICK, SUPERINTENDENT,

Windmill-Parts.com

The Green Mount Cemetery,

5th and Rising Sun Lane, Phila., Aug. 1st 1888.

Gentlemen:—The EUREKA Wind Mill you erected for the Green Mount Cemetery Company some two years ago has given perfect satisfaction, and when placed before the wind will stand any storm. Can see mill at work any day at grounds.

Respectfully,

E. P. FRICK, Supt.

To Persons Contemplating Buying a Wind Mill

The Manufacturers of the "Eureka" beg leave to suggest some of the advantages they have to offer:—

Its construction is simple and its movements are so complete that they do not get out of order.

Its movement is steady and noiseless. The working parts are entirely enclosed and warranted never to freeze up.

All mills are babbitted with graphite babbitt, the best and most expensive babbitt made.

We have experienced men to plan and skillful mechanics to erect our work.

We have a full line of goods and repairs constantly on hand, with different agencies all over the United States from which they can be supplied promptly when wanted.

It is a standard Mill and giving universal satisfaction, and is fully warranted. It has a brake attached, holding wheel quiet when out of gear, thereby preventing danger to Mill.

All Mills, small as well as large, have truss braces in front of wheel, which makes wheel very strong.

The "Eureka" was awarded FIRST PREMIUM and GOLD MEDAL at New Orleans, La., in 1844-5. at the World's Industrial and Cotton Centennial Exposition, in competition with twelve leading Wind Mills, all claiming superiority.

The "Eureka" was also awarded FIRST PREMIUM and BRONZE MEDAL at Louisville, Ky., Exposition in 1885.

Wind is an untiring servant, labors day and night without fuel, wages or instruction and never tires.
